

LifeOnRecord let's you capture and preserve your memories and stories, count your blessings, work through your anxieties, and remind yourself of what's important.

There are moments that should be remembered that often get lost as we go about our lives. LifeOnRecord is the easiest way there is to capture these moments.

It helps you chronicle your day-to-day life with the ease of dialing a phone and talking.

Using **LifeOnRecord** is Easy!

With your subscription, you'll receive a number to call and record your thoughts. It's as simple as using the telephone, and you can also manage your recordings from a secure web site, download them to your computer, play them in iTunes™ and receive them in email to pass along to others.

You can easily download and archive your recordings to CD, or LifeOnRecord can mail you monthly CDs with your recordings from the previous month.

Think of all the times you say,
“I have to write this down”, or
“Don't let me forget this thought”...

*Describe memorable
vacation experiences
right after they happen....*

*Call during your morning
commute to rehearse your
day. Call again later to
talk about what went well...*

*Re-tell a funny story you
don't want to forget...*
